Zalt 11 Lure Jerkbait 11cm / 4.33 inches: The genuine lure from Sweden. These lures have a great reputation in Scandinavian countries and are constantly featured in hit lists and charts of major catches. Everyone who is familiar with these wobblers definitely understands why this is the case: casting or trolling - the Swedes find the fish! Therefore fishermen who fish from a boat or from the shore will enjoy the process equally. The Zalt's original and compact form allows throwing the wobbler at an extraordinary long distance from the shore or from a boat. You can achieve the best chances for a catch if the bait is not being reeled in monotonously, but instead, pulled with short bursts of movement to imitate the movements of a real fish.
