

Matrix Alloy Open Method Feeder

Matrix

Product number: MA-GFR18X

New, open feeder with a huge amount of new catch-improving features.

3,49 €* 3,49 €

The new Open Method Feeder are real catching machines. They are an advancement of the original Evolution Open Method Feeder. With the emphasis on the front, the larger model is perfect for long-distance fishing, while the small size is ideal for winter fishing with minimal amounts of feed. The feeders are made entirely of an injection-molded alloy to ensure better weight distribution and the raised front protects the food against impacts.
