Super stable and user-friendly, the STAR Seminole I inflatable kayak is designed for commercial outfitters, camps and rental programs who want to give their customers a great experience on the river. Or for private persons that just want to have fun on the water.

- Extra kick, oversized tubes and a wide beam combine to give even the most inexperienced paddler confidence in whitewater.
- STAR inflatable kayaks are built with advanced-formula PVC material using state-of-the-art seam welding technology, resulting in superior abrasion resistance, longevity and air retention at a great value.
- The drop stitch PVC floor insert inflates to a rigid 8-10 psi, giving the paddler a stable and comfortable position above the water.
- An inflatable thwart seat gives the paddler a comfortable backrest while making the boat quick to set up, simple to maintain and easy to roll up and store.
- Thwart seat attaches with straps through drain holes in the self-bailing floor, allowing you to position it to suit the paddler.
- Two easy-to-use straps hold the drop-stitch floor insert securely in place.
- Bow and stern handles make the Seminole easy to carry to and from the water.
- Top-quality Leaffield™ C7 valves ensure trouble free inflation and deflation.
- Includes a repair kit.
