

Fox Medium Tackle Box

Fox

Product number: FX-MTB

A successful concept for organisation and storage.

from 49,99 €* 49,99 €

The New Fox Tackle Box range has taken the legendary Fox F-Box concept, inspiration from the market and a host of new ideas to bring it right up to date and back where it belongs at the forefront of tackle box design. Using the entire lid as additional end tackle storage, we have maximised capacity whilst keeping the box as compact as possible. The lid comprises of 37 individual compartments, featuring improved, pinned hinges and smoked tinted closers that allow products to be seen inside. Additionally, a sheet of stickers is supplied to label the contents for quick identification should you require.

When opened the lid stops at exactly 180 degrees, this makes tying up rigs with your tackle box on your lap easy as you can use the inside of the lid as an area to work from. The lid also features a ruler on both the inside and outside to aid with rig tying.

The base of the Tackle Box has been designed to accommodate the all new Standard and XL Internal Compartment Boxes, Adjustable Compartment Boxes, Hook Boxes plus the ingenious Leader Racks in Standard and XL. The box features 3 long, 2 short and 1 medium divider these are removable and segregate the base and allow you to customise to your preferred configuration. The spacing of the divider slots has been carefully considered to make the most of the space available, ensuring the internal compartment boxes don't rattle around in wasted space and keep all manner of end tackle secured efficiently. Anything from rig tools and standard hooklength spools to larger leader style spools can perfectly fit in this box.

The Tackle box also uses VCI (Volatile Corrosion Inhibitor) in its makeup, this helps to slow down the corrosion of any tackle items should the inside get wet. The dimensions of the box are 27x19x7cm.
